Patent Pending
**AI Imaging
Technology**

Applications

Import / export quality inspection

Assess freshness at purchase

Ensure freshness at retail

Spot Check

AI App
for assessing
quality

Testimonials

Keells

One of the largest retail operators in Sri Lanka is using GoMicro for tuna assessment

“Keells has now tested GoMicro AI to assess the quality of Yellowfin Tuna. GoMicro AI can accurately differentiate fresh tuna from tuna that is spoilt” - Mifrah Ismail Vice President John Keells Group Head of Fresh Food

Oyster Grading

We are now at the final stages of our beta trials for Oyster grading for Fish Tales - based in the Sydney Fish Market

Create your Own Standards

Fisherman
Exporters

Super Markets
Importers
Food manufactures

Quality can now be assessed throughout the supply chain

How Does It Work?

1

You provide 50~150 images of each category you want to classify with GoMicro AI

Fresh tuna

Spoiled tuna

2

We build a customized model for your application and deploy it on your Spot Check app

3

You can test it and use it

Get Started

How to get started?

We have a trial package for \$600 AUD + postage. You will get a GoMicro (test version) and we will build a grading app for you based on the images you sent of the grades.

Commercial arrangement ?

When you are happy with the technology you can decide on the number of devices you need. We charge a monthly subscription based on an estimate of use and the value of the vegetable recorded through our system.

What can I assess?

Anything a human expert can assess by eye - GoMicro can.
